Subject: South 4 Group Fire: Update regarding tower that may have fallen

Hi Adam,

At about 0855 hours, while the drone was coming down because of a low battery, a new puff of smoke / blaze was observed. Another drone was sent up, because it was believed that a tower may have fallen. Personnel in the EOC reviewing the drone flyover determined no tower had fallen and did not determine what caused the small puff of smoke and blaze.

Thanks,

James Collins, GIT
